# Boluwatife Ayesoro

*Software Engineer*

✉ abrahamayesoro@gmail.com  📞 08109917811  📍 Lagos, Nigeria  ⦿ AyesoroBolu

## PROFILE

I'm a passionate Full-Stack Software Engineer who loves building creative solutions. With a foundation in both front-end and back-end development, I thrive in fast-paced, team-oriented environments. I'm adaptable, organized, and always eager to learn new technologies—especially when faced with challenges that push me to grow and innovate.

## SKILLS

**Frontend** — React.js, HTML, CSS  │  **Backend** — Node.js, Express.js, FastAPI  │

**Databases** — MongoDB  │  **DevOps & Cloud** — AWS (EC2), CI/CD (GitHub Actions)  │  **Version Control** — Git, GitHub

## PROFESSIONAL EXPERIENCE

01/2025 – present  **Intern Fullstack Developer**
*HNG*

Developed and deployed multiple backend APIs, including a **public API** for returning structured JSON data and a **Number Classification API** using **Node.js**.

• Built a **FastAPI application with CI/CD**, deploying it on **AWS with Nginx as a reverse proxy**, and implemented **GitHub Actions for automated deployment**.

• Integrated a**Telex API service**, for **cloud instance monitoring** to send alerts when an EC2, Droplet, or VM instance goes down, ensuring high availability and system reliability., using **TypeScript & Express.js**.

• Utilized **Git, GitHub, and CI/CD pipelines** for version control and seamless deployment workflows.

## PROJECTS

**App-Shop**  🔗

**Portfolio-Website**  🔗

## EDUCATION

10/2022 – 12/2024  **Associate Degree. Software Engineering**
Lagos, Nigeria  *Aptech Computer Education*
Covered core modules such as Fundamentals of
Java, Object-Oriented Programming with Java
and C#, UI/UX for Responsive Design, Database Management (SQL Server), MongoDb, DAta Science using R, Data analysis withTableau, Querying with MySQL, Programming guide for Python, Processing Big Data with Hadoop, Data Structures and Agile System Development Life Cycle for Software Projects.
